

G A M E G U A R D P E R S O N A L 3 . 0

nProtect GGP 3.0

nProtect GGP 3.0 provides game optimization by deleting all unnecessary files, recovering up to 50% of memory to boost game-play and optimize system & network settings in one click!

MAIN FUNCTION

01

Unified security solution for virus and spyware

GameGuard Personal 3.0 scans and protects the system from malicious software and spywares using our advanced Tachyon engine, developed by nProtect. In addition, a renowned global pattern engine is used in GGP 3.0 to protect the system from various virus attacks.

Game optimization feature

GGP 3.0 enhances game performance and stabilizes internet connection by optimizing the PC environment without affecting the hardware. Furthermore, GGP 3.0 error analysis and solutions help to offer more stable online game play.

02

03

Microsoft Security Update and self-recovery

GGP 3.0 prevents gamers from getting exposed to hacking tools and malicious spywares. It also protects the system automatically by installing Microsoft Security Updates.

When major files of the program, such as the anti-virus engine or pattern, are damaged, the program recovers itself from the damage and keeps the system safe.

Network Intrusion Prevention System

GGP 3.0 prevents network intrusions by other programs and only allow user-authorized programs to use network resource during gameplay. In this way, GGP 3.0 provides secure and optimized gaming environment with a safe protection from hacking tools and malicious spywares such as backdoor, worm and IP spoofing.

04

05

File encryption and permanent file deletion

GGP 3.0 encrypts files that contain valuable information, such as gamer ID and password, and deletes user-selected files permanently from the system.

FEATURE

8 years of experience in game security

With nProtect's over 8 years of experience in online gaming security, GGP 3.0 provides secure gaming environment and is used in 260 games in 17 countries worldwide.

System optimization and speed enhancement for best gaming environment

GGP 3.0's game optimization feature is free of charge and provides fast and safe gaming environment by optimizing the PC.

Best performance and rapid responsiveness security solution

GGP 3.0 runs automatically to update its latest GameGuard engine so that user's PC is protected from newest hacking tools and malicious spywares.

SYSTEM REQUIREMENTS

Operating System	Details	Recommended	Minimum
Windows Vista	CPU Memory	2GHZ higher 2GB	1GHZ higher 512MB
Windows XP	CPU Memory	700MHZ higher 512GB	266MHZ higher 256MB
Windows 2000	CPU Memory	700MHZ higher 512GB	266MHZ higher 256MB
Common	HDD	300MB higher	200MB higher

Windows 7 supports the same system requirements with Vista
